Comments: water quality is important

We have to replace pavement at churches,  
mall, schools, recreational area, YMCA's,  
and at other places such as parking lots  
at factories with pavement that allows water  
to seep into the ground preventing massive  
run off that brings with it a lot of pollution  
to local water sources. There are now special  
pavements that are allowing water to seep in at the  
site
